# Report Requirements

The reports will be evaluated based on, and should conform to the following criteria:

1. The lenght: 3-5 pages in the format of this document (a4, font size 11pt, margins: top=2.5cm, bottom=2.5cm, left=2.5cm, right=2.5cm). The archive can be downloaded from the Web directory of the course.

2. Should be self-contained (no need to read the paper to understand the report).

3. Should present a running example (extra points if other than the one given in the paper).

4. Should discuss shortcomings of the approach.

5. Should be readable (this includes also: clarity, clear images, the size of the font text in the figures should be comparable to the one of the document, the figures should be referenced and explained in the text).

6. Should not copy text from the paper (only the definitions can be reproduced).

7. Should clearly state the contribution (how it advances the existant work; if the paper claims a contribution that you estimate as minor, you should not cite it)

You most certainly can't describe everything from the paper. So you should only extract what is important!

The first 5 points above apply also to the document describing your implementation of the project.
